SANY

For challenging tasks, you need a first-class partner

Quality comes from experience. And from new ideas. This is why we combine these two crucial factors at SANY. This is because we are one of the world's leading producers, having sold more than 250 000 excavators in 10 years. This means that you can always rely on sophisticated products that have been tried and tested in practice. An impressive 5–7% of our annual turnover is dedicated to research and development. This is why we give you not only our word, but also our extraordinary five-year warranty as a guarantee of how powerful and robust our products are.

AND DEVELOPMENT

Max. bucket digging force 27.9 kN (ISO) Max. arm digging force 14.2 kN (ISO) Swingspeed 10 rpm Max. travel speed 4.5 km/h

THE MOST COMPACT COMBINATION OF PERFORMANCE AND FUNCTIONALITY

The "small" machines from SANY have always been among the greatest when it comes to cost effectiveness and efficiency — it's no different for the new SY26U mini excavator. It's in its element wherever it can demonstrate its speed and power, even in confined spaces. Its manoeuvrability and extremely precise control are also impressive in road

construction, horticulture and landscaping. The new small model shows its strengths even when just travelling to the workplace, as its comparatively low weight and compact dimensions allow for fast and safe loading and unloading. The SY26U is also available with cab or as a canopy version.*

FOR INTELLIGENT MINDS -PRODUCTIVITY MADE SIMPLE

The new SY26U boasts a whole host of properties that allow you to make crucial savings. These include, for example, the advanced load-sensing hydraulic system designed to improve speed and performance whilst simultaneously reducing fuel consumption.

Absolute reliability – for peace of mind!

SANY's five-year warranty* gives you the assurance that you can fully count on your equipment.

* With participating partners

Robustness included. And a five-year warranty

From the choice of materials and the design, right through to the workmanship, durability and robustness is a priority for all SANY mini excavators. They have been tried and tested time and again in tough practical applications. For example, all cladding parts are made solely of sheet metal, which makes them particularly longlasting and easy to repair when necessary. And the five-year warranty gives you the peace of mind that you can fully count on your equipment.

Cleverly thought out - even when the cab doors are open, they still fit within the machine's turning radius.

If you want to set your sights high, you will have to dig down deep

You won't reach your limits in a hurry with the new SANY mini excavator. The robust boom design and carefully considered weight distribution allows a maximum horizontal reach of 4850 mm, a maximum vertical reach of 4410 mm and an excavation depth of 2820 mm.

Its structure as a short-tail-swing machine ensures that it can work well and quickly even on construction sites where space is tight.

QUALITY

Robust reliability - even the small models from SANY can work powerfully, meaning that it must be able to withstand enough. This is why they are build and machined solidly from the ground up, for example with highlypre-cise robot-welded seams, for example,

USER EXPERIENCE

Always making work easier - everyday work can be demanding for the excavator operator. We make it all a bit easier, for example, thanks to the comfortable air-suspension seat or the large high-resolution colour

DIMENSIONS

Small powerhouse - with its compact di-mensions and manoeuvrability, the shorttail-swing excavator can do its job best where space is tight, and the smart swivel bracket solution lends it increased agility.

SAFETY

Inherently safe - the SY26U is equipped with numerous safety details as standard. These include lockable covers and a battery disconnection switch, and the cylinder protection on the

COMPONENTS

Improved details - good visibility is the foundation for good work. Powerful LED work lights illuminate the work area evenly. The YANMAR drive unit also impresses thanks to its reliability and power.

ECONOMY

Cost effectiveness as a benchmark - the efficient load-sensing hydraulic system con-trols the variable flow rate of the piston pumps, thereby guaranteeing sufficient power to carry out all operations smoothly and safely, as only the required power is provided.

USER EXPERIENCE

Convenient maintenance is at the top of the agenda thanks to rear access

The wide-opening engine bonnet and the clear arrangement of the key components in the centre make maintenance and service quick and easy; the air filter, water separator, oil dipstick and oil filler neck are especially easy to reach.

SAFET

Operating excavators by sight – truly impressive

A good view of outside is indispensable if you are to perform your work accurately and quickly. The SY26U's cab offers the operator a wide field of view, allowing them to keep an eye on all areas and work steps. The entire work area can be controlled with ease thanks to the large front, side and rear windows, without the driver having to get out of their seat. If work on a construction site takes a little longer, the LED headlights illuminate everything perfectly. Further advantages of this system include its low energy consumption and a much longer service life.

Our highlights – the added benefits SANY offers you:

- + Two auxiliary proportional control circuits as standard
- + Quiet and low-vibration engine
- + Large monitor
- + Efficient load-sensing hydraulic system
- + Responsive, precise control
- + LED work lighting
- + Air-suspension seat
- + Clear displays
- + Optimal visibility on all sides
- + ROPS/FOPS-certified for safety in operation
- + Cab or canopy version

USER EXPERIENCI

TOP MARKS FOR YOUR NEW WORKPLACE

Safety, comfort, ergonomics... this cockpit has everything you need to make your day-to-day work more convenient and simple. This starts when you enter the cab, which you can do comfortably and safely. And after that? Handling is simply effortless. Not only because the interior has a carefully considered ergonomic design but also because it offers you a lot of scope to respond. It is also convenient and comfortable thanks to the perfectly designed ventilation system and full seating comfort, due to the seat suspension. In addition, all displays can be read effortlessly on the large, high-resolution colour screen, while the wide field of view provides you with perfect visibility on all sides.

The two auxiliary control circuits allow the adaptation of various attachment devices. This means tilt buckets can also be attached in addition to the backhoe, in the case of fully integrated control. As two auxiliary control circuits are available, operating gripper tongs is no problem at all; the gripper tongs can be turned using one side of the joystick, and can be opened and closed using the other. Of course, it is also possible to operate a hammer, thanks to the standard hammer valve. This means you and the machine can be ready for any application.

Powerful and mobile – the SY26U is well-equipped by its very nature!

It has everything it needs to become an indispensable aid. Its impressive properties include not only its power and endurance, but also the precise response characteristics of all the components thanks to the sophisticated hydraulic system. Outstanding performance for a fair price: That's what we call cost-effective.

Parts supply quick and reliable

SY26U Canopy

With the purchase of a SANY mini excavator you have made an investment in the future. Fast availability of spare parts is your guarantee of minimal downtimes and failure times.

A SERVICE YOU **CAN RELY ON**

ERTU PLANT & EQUIPMENT

and reliability of our service products. This underlines our happy to help you with a comprehensive range of services to equipment's performance in terms of their durability and their ensure that your machine continues operating efficiently in the excellent price-performance ratio. After all, maintenance is crucial

Just as we do with our excavators, we also demand high quality for efficiency, cost-effectiveness and safety. Your SANY dealer is

Global Brand, Local Knowledge

Flexible, fast and always there for you

Rapid assistance, tailored advice, and a reliable supply of original parts all around New Zealand.

The Vertu Difference

- + Site visits to get your machine back up and running as soon as possible.
- → Significant inventory of SANY genuine and after market parts and attachments.
- + Expert knowledge including SANY trained
- + If a repair cannot be undertaken on-site or in good time, Vertu will arrange a similar replacement while your machine is repaired under warranty.

Our service network provides certainty that you are supported with services and parts wherever you are located around New Zealand.

Detailed information in black and white

Handbooks and documents are available for all SANY mini excavators, and these can help you with operation, maintenance, servicing and repairs. These include operating and maintenance instructions and technical

HIGHLIGHTS **SY26U**

COMPACT POWER-HOUSE FOR THE FINER DETAILS

Intricate tasks on construction sites in towns and cities or in horticulture and landscaping depend on manoeuvrability and precise control. This, combined with a great deal of power, makes the SY26U a high-quality power-house, and therefore a reliable partner for you.

ROBUST RELIABILITY

High-quality materials and careful machining guarantee the highest degree of solidity and stability even under stress.

ALWAYS COMFORTABLE

Whether with a cab or as a canopy – the cockpit is equipped with comprehensive comfort equipment, making it easy for the operator to maintain concentration throughout the day.

SMALL POWERHOUSE

Thanks to its **compact design**, the SY26U greatly simplifies working on confined construction sites. With its compact

dimensions, it offers the best conditions to be easily attached to a car trailer.

INHERENTLY SAFE

Maximum safety for drivers, the construction site environment and the machine itself is integrated on-board as standard. This means you can count not only on the protection of people and machines, but also on an optimum level of operational safety.

IMPROVED DETAILS

The extensive standard features and equipment with high-quality components from tried and tested brand manufacturers make the SY26U a reliable partner and the machine a universal marvel in virtually every application.

TECHNICAL HIGHLIGHTS COST EFFECTIVENESS AS A BENCHMARK

The **smart control system** adapts the pump power to the available engine power. For **greater efficiency** of the hydraulic system and **reduced fuel consumption**.
